Subject: Aircraft Fuel Levels

The following are the fuel levels to fill the fuel tanks in the flight school's aircraft.

C-172s: (N61701 and N1464E) Fill the tanks to within ½ inch of the filler neck. This will allow a little room for expansion.

C-152 (N67495) Fill each tank to 10 gallons, which is 20 gallons total.

P28 (N3069Y and N41977) Fill only to the internal tabs in each tank.

Ercoupe (N94043) Fill to full in the header tank and 4 gallons in each wing tank.
